The Fourth passed with no serious  
accidents to the pleasure of the  
people. The younger element began cele-  
brating at 12:01 Thursday morning and  
were busy until a late hour. The To-  
loletti company's plant was idle and  
the store closed at an early hour.

Improvements made by O. LaRoche  
on his residence and grounds during  
the past two months now make his  
property one of the finest in the vil-  
lage.

Science.  
It has been found that the tube  
that expands on stretching, as water,  
oil, or a lowly temperature when  
the pressure is increased, while the  
others freeze at a higher. When a  
substance that expands under  
higher pressure than usual, it has to  
expand more freely to absorb the pres-  
sure, and consequently has to  
use up more of its heat energy, thus  
losing more heat and consequently be-  
coming colder.

Paras With Money in a Cod.  
A housekeeper at Queenstown, Ire-  
land, considerably harassed while  
cleaning a codfish about 80 pounds in  
weight discovered inside the fish a  
purse containing a number of silver  
coins of the reign of Queen Victoria.  
The purse was of leather, steel bound  
and in good preservation. It also con-  
tained some tattered paper, which  
was reduced almost to pulp.

Retort Discourteous.  
An Englishman and a Welshman  
disputing in whose country was the  
best living, the Welshman said:  
"There is such noble housekeeping in  
Wales that I have known above a  
dozen cooks employed at one wed-  
ding dinner." "Ay," answered the  
Englishman, "that was because every  
man toasted his own cheese."

Living for Others.  
There is light and sanity, safety and  
beauty in thinking, planning, working,  
living for others. It is a guide to a  
better way. It is a guide to peace,  
health and safety of the mind and  
the soul alike. But self-coddling, self-  
evaluation, self-interest run mad—  
that distortion of human nature is a  
potent lure to destruction. It is of  
the very essence of crime—Reckless.
